We reviewed with the students the purpose of the meeting and the importance of their input. We also described the National School Lunch Program rules and our wellness policy.

The Principal and PTA parents said they are completely satisfied with the lunch options we are serving.

The children are eating healthy and well. They appreciate us complying with feedback that is given to us from the children.

The children said they like the boneless chicken, personal pizza, mini pancakes, and new bento boxes.

They wish we could do homemade waffles every day.

They love when they have chicken soup, pasta, and of course pizzeria pizza.

Nothing negative other than not wanting tomato soup!

The staff is committed to continually seeking the students valued input. We told students to keep in contact with us and thanked them for their time.
