

Activity Directions:

1. Choose 4 (or more) Hive Effect Acts to Complete Over the Summer:

These are small, positive actions that can create a ripple. Students can choose from a list or create their own!

Examples:

- Write a kind note and leave it for someone to find.
 - Help a neighbor with a chore.
 - Make a thank-you card for a community helper (mail carrier, firefighter, librarian, etc.).
 - Donate a toy or book to someone in need.
 - Invite someone new to play or hang out.
 - Share something you've learned with a sibling or friend.
 - Start a mini cleanup project in a park or local space.
- ### 2. Document Your Hive Effect Acts:
- For each act, **write a sentence, draw a picture, or take photos** showing what you did on your hexagon.
- ### 3. Reflect:
- What you learned from this experience?
 - How does it feel to be part of “The Hive Effect”?
 - What is one ripple effect you noticed or hope happened?
-

Bring It Back to School: Don't forget to bring your hexagon back to school.

In September, students will **share their Hive Effect journey** through a:

- Hive Wall – everyone's hexagon will be added to a giant honey comb in each building, showing how their act connected to others!
